

Bulk water meter

Water meters with a nominal diameter of 40mm and below are usually called small-diameter water meters, and water meters with a nominal diameter of 50mm and above are called bulk water meters. These two kinds of water meters are sometimes called civil water meters and industrial water meters. At the same time, this method can also be distinguished from the connection form of the meter shell. The water meters with a nominal diameter of 40mm and below are connected with threads, and the water meters with a nominal diameter of 50mm and above are connected with flanges.

Shengda water meter can produce many types bulk water meter, such as bulk mechanical water meter and bulk smart water meter

Types: Woltman water meter, irrigation water meter, stainless steel bulk water meter, bulk hot water meter, bulk ultrasonic water meter, Bulk NB-IOT water meter, bulk LoRa water meter, bulk LoRaWAN water meter and bulk water meter with pulse.

Delivery condition :

► Size: DN40~DN900 ► Material: Cast iron shell ► R: R50,R80,R100,R200,R400.etc

Applicable conditions:

► Cold water: 0.1 ~ 30 °C ► Hot water: 0.1 ~ 90 °C ► Working pressure: 1.0MPa, 4.0MPa

Remote reading with wireless (LoRa, LoRaWAN, NB-IOT), wired meter reading (M-BUS, MOD-BUS)
